

To: - **DBE replacement team**

Dear Madam/Sir

This Motivation letter is regarding to the announcement and posted on DBE intranet for the job position of **Manager, Start ups and idea financing Team industry cluster**. I would like to bring to your notice that I am interested in the particular program and would like to apply on it.

My first work carrier is started in teaching elementary school after I awarded my certificate when I was 17 years old, as that time I was too much young, but I and my family was happy due to the work and am also able and get a chance to support my family , but I never stooped just I continued my learning and earned a diploma from the same college in teaching natural science i.e. Math, chemistry and physics in elementary school, secondly I awarded my BSC degree in applied mathematics from Addis Ababa university and BA in accounting and finance in the same year from Defense university. In 2018 I awarded my MSC in project planning and management from Debremarkos and Yom joint masters program and right now am in research stage to complete my MBA in business administration and it will be completed with a short period of time.

I have been teaching in elementary schools and colleges for the 15 years since September 2005 G.C, but after I awarded my BA degree in accounting and finance I have got a chance to join a banking sector and starting my new job in Development bank of Ethiopia in August 10, 2015 to date. During my carrier I have gotten many good peoples with good mentality and perceptions too. I was highly sociable in my work places and I have shared good ideas; we have participated in social community activities and charities too. I have a huge plan to bring a change in my carrier and to build up my mind and to be one of the role model in the organization for others, the main reason why I need and chosen this job is to see new life challenges, new work environment, to build my life experience and carrier level.

Lastly if I get the chance to join this highly quality organization I always work in group with my work colleagues and support each other to contribute our maximum effort for all kinds of the bank transformations.

Sincerely,

ADONAY TSEHAY
