Placement Team-Managerial Jobs

September, 24, 2021

Dear, Sirs

As an acting Director Engineering Services Directorate, and more than 14 years of work experience in the Bank, I have a proven ability in the Engineering Service. It is with great enthusiasm and confidence that I am applying for the role of **Manager, Engineering Projects Management Office (PMO)** under **president offices**.

In my previous role as Head office renovation team member at manager level I had the opportunity of giving decision of rehabilitating the first basement slab and the tow ramps found at the opposite side which were beyond repair and we have decided to completely demolish the concert part , add additional reinforcement , use chemicals (Net bond) which connects the old and the new concrete , add structural strengthening fibers to increase the load caring capacity of the newly casted concrete slab. This was a gallant decision be it analytically, methodologically ,and procedurally. I am proud to be part of the professionals who solve this problem and lead the construction of the project as a structural engineer.

The new organizational structure follows the newly formulated home grown Economic strategy of the government of Ethiopian for the financial *sector*. I strongly believe that DBE's **five year strategy reform plan** is part of this, as such I believe and should strive towards this new goal.

I shall give my ample experience, motivation, organizational and analytical skill in solving complex engineering problems by motivating and leading various engineering professionals so that they should work with the understanding their work shall be full-fledged, up to standard, follow modern methods and cost effective. If I am appointed as **Manager, Engineering Projects Management Office (PMO)** my vision will be addressing the above mentioned points.

I thank you for your consideration to the post of **Manager, Engineering Projects Management Office (PMO)** under **president Offices**, and I look forward to impact and fulfill the new organizational strategy of DBE with my full potential.

Sincerely,

Abraham Kebede
