Development Bank of Ethiopia Addis Ababa

Subject: Applying for Job: 'Appraisal Technical Division Head, Engineering

Directorate (Agricultural Cluster)

Dear Hiring Team,

From the *Internal vacancy* announcement, I have noted that Our Organization, Development Bank of Ethiopia, is seeking for a qualified applicant for the post of 'Appraisal Technical Division Head', Engineering Directorate of Agriculture Cluster; and, I would like to apply for the position.

Work Experiences:

15 years of Services, out of which, 4 years in Managerial Responsibilities like Head of Natural Resources Department at College.

Now, I am working here at **Development Bank** of **Ethiopia**, as a Senior Agricultural Engineer (more than **6 years** of experiences, majorly at **Research** and **Project Data Management Directorate**, which believed **to have direct positive** inputs to the position I am applying for. Formerly, I was working in different Colleges as an Instructor (**5 years** of experiences [excluding the Managerial positions]).

Educational Background:

I have **MSc** degree in **Irrigation Engineering** from Haramaya University; which I accomplished 7 years back, in 2015 GC. My **BSc** degree is in **Agricultural Engineering** and **Mechanization** from Hawassa University. I have also Diploma Certificate in Basic Computer and Auto-CAD, different trainings on Mechanization Implements, GIS and Asset Valuation; apparently, these will be helpful for Appraising Projects.

Vision, Plan of Works, Reforms and Positional Competence:

Having in mind that I was one of the Reform team members under the close Supervision of the President, I shall have a plan of Technical Appraisal issues, defining a Project or Proposal (Feasibility study) to develop options in selecting Prior Projects at possible optimum time, right before their Approval. Fair, honest and timely service will enhance the Reforms of the Bank. Meanwhile, I am of three disciplines (Irrigation, Mechanization and Agro-Engineer), which definitely makes me more competent for the requirements of all-rounded position.

I am eagerly hearing from you. Thank you!

"Mechanized-Irrigation-based-Agriculture is the Future!"

Sincerely,

Shambu Tolossa; 091 1 18 64 10; shambut@dbe.com.et
