## Development Bank of Ethiopia Addis Ababa

Subject: Applying for Job: 'Technical Division, Applied Research Directorate'

Dear Hiring Team,

From the *Internal vacancy* announcement, I have noted that Our Organization, Development Bank of Ethiopia, is seeking for a qualified applicant for the post of 'Technical Division Head' under Applied Research Directorate; and, I would like to apply for the position.

## Work Experiences:

**15** years of Services, out of which, **4** years in Managerial Responsibilities like Head of Natural Resources Department at College. Now, I am working here at Development Bank of Ethiopia, as a Senior Agricultural Engineer (more than **6** years of experiences, majorly at Research and Project Data Management Directorate); and formerly, I was working in different Colleges as an Instructor (**5** years of experiences [excluding the Managerial positions]); I believe both have their own contributions to the position I am applying for.

## Educational Background:

I have **MSc** degree in **Irrigation Engineering** from Haramaya University; which I accomplished 7 years back, in 2015 GC. My **BSc** degree is in **Agricultural Engineering** and **Mechanization** from Hawassa University. I have also Diploma Certificate in Basic Computer and Auto-CAD, different trainings on Mechanization Implements, GIS and Asset Valuation.

## Vision, Plan of Works, Reforms and Positional Competence:

As parts of my set visions and Plan of Works, having in mind that I was one of the Reform team members under the close Supervision of the President, I shall have a plan of **New Approaches**, **Proactive Applied Research Methods**, **Improved way of having Engineering Data Bases** that go with the **Structural** and **Systemic** DBE's Reform workouts, to contribute to the **Big Picture** of the **Bank**; which ultimately, corresponds with the vision of **DBE**.

Most importantly, I am an **Irrigation Engineer**, I am a **Mechanization Engineer**; and I am also an **Agro-Engineer**, which are worthy of specialization reform concerns by ease of handling/managing two to three or even more Engineering tasks smoothly and simultaneously.

I hope, I am the best possible as of the requirements of the position.

I am eagerly hearing from you. Thank you!

"Teamwork worth Championship!"

Sincerely,

AVAR
